**Advanced Classical Design, AG 1012-13 RF Generator
offered as a Direct Drop-in Replacement for the obsolete
“ENI OEM12B Series”**

- “Direct Replacement”, “Pin for Pin compatible”, “Plug and Play”.
- AG 1012-13 Replaces the OEM12B Series and ACG-10B Series.
- 1250 Watts of Precise RF Power at 13.56 MHz.
- Design for Industrial, Laboratory and Drop-in Replacement Markets.

Rochester, NY, February 5, 2008 - T&C Power Conversion announced today that it is releasing a new AG 1012-13 RF Generator. It is the latest T&C release in a line of products to provide customers with a direct drop-in replacement for obsolete “ENI” units. The AG 1012-13 RF Generators are well suited for many applications in the Gas Plasma Markets, Sputtering applications and the existing drop-in replacement markets. This classical solid state RF Generator offers a rugged design, power accuracy, compact, reliable, stable and optimized process performance. The new AG 1012-13, a replacement for the obsolete OEM-12 generator has many outstanding features including analog interface and enhanced RS232 communication ports for interfacing to T&Cs’ latest GUI (graphic User Interface), front panel control of amplifier and generator functions, exceptional built-in T&C LCD Digital Front Panel Metering that provides the user with FWD, REV and LOAD power measurement accuracy better than +/- 3%.

T&C Power Conversion, Inc. is a leading provider of RF Generators and RF Amplifiers. T&C builds quality world class designs of RF Generators and RF Amplifiers. For more information about T&C Power Conversion, Inc. products please visit our web site: www.TCPowerConversion.com
